

FLOW MEASUREMENT SOLUTIONS FOR AEROSPACE AND DEFENCE INDUSTRY

The Right Flow Measurement Solution

FUEL MANAGEMENT SYSTEMS

Accurate, instantaneous fuel flow rate and consumption data with cockpit display integration. Built for high reliability with stainless steel construction, meeting fire resistance standards.

FLIGHT TEST READY

Our flow measurement equipment monitors critical fluid flows, including fuel, coolants, and refrigerants, on board today's most advanced aircraft.

HYDRAULIC FLUID MEASUREMENT

Compact, rugged flowmeters designed for flight tests, ensuring precise monitoring in the toughest environments

TEST STANDS & TEST CELLS

Precise metering for fuel flow in engine test cells and hydraulic carts, improving overall test performance.
