Intelligent Automation Solutions for Water & Waste Water Industry
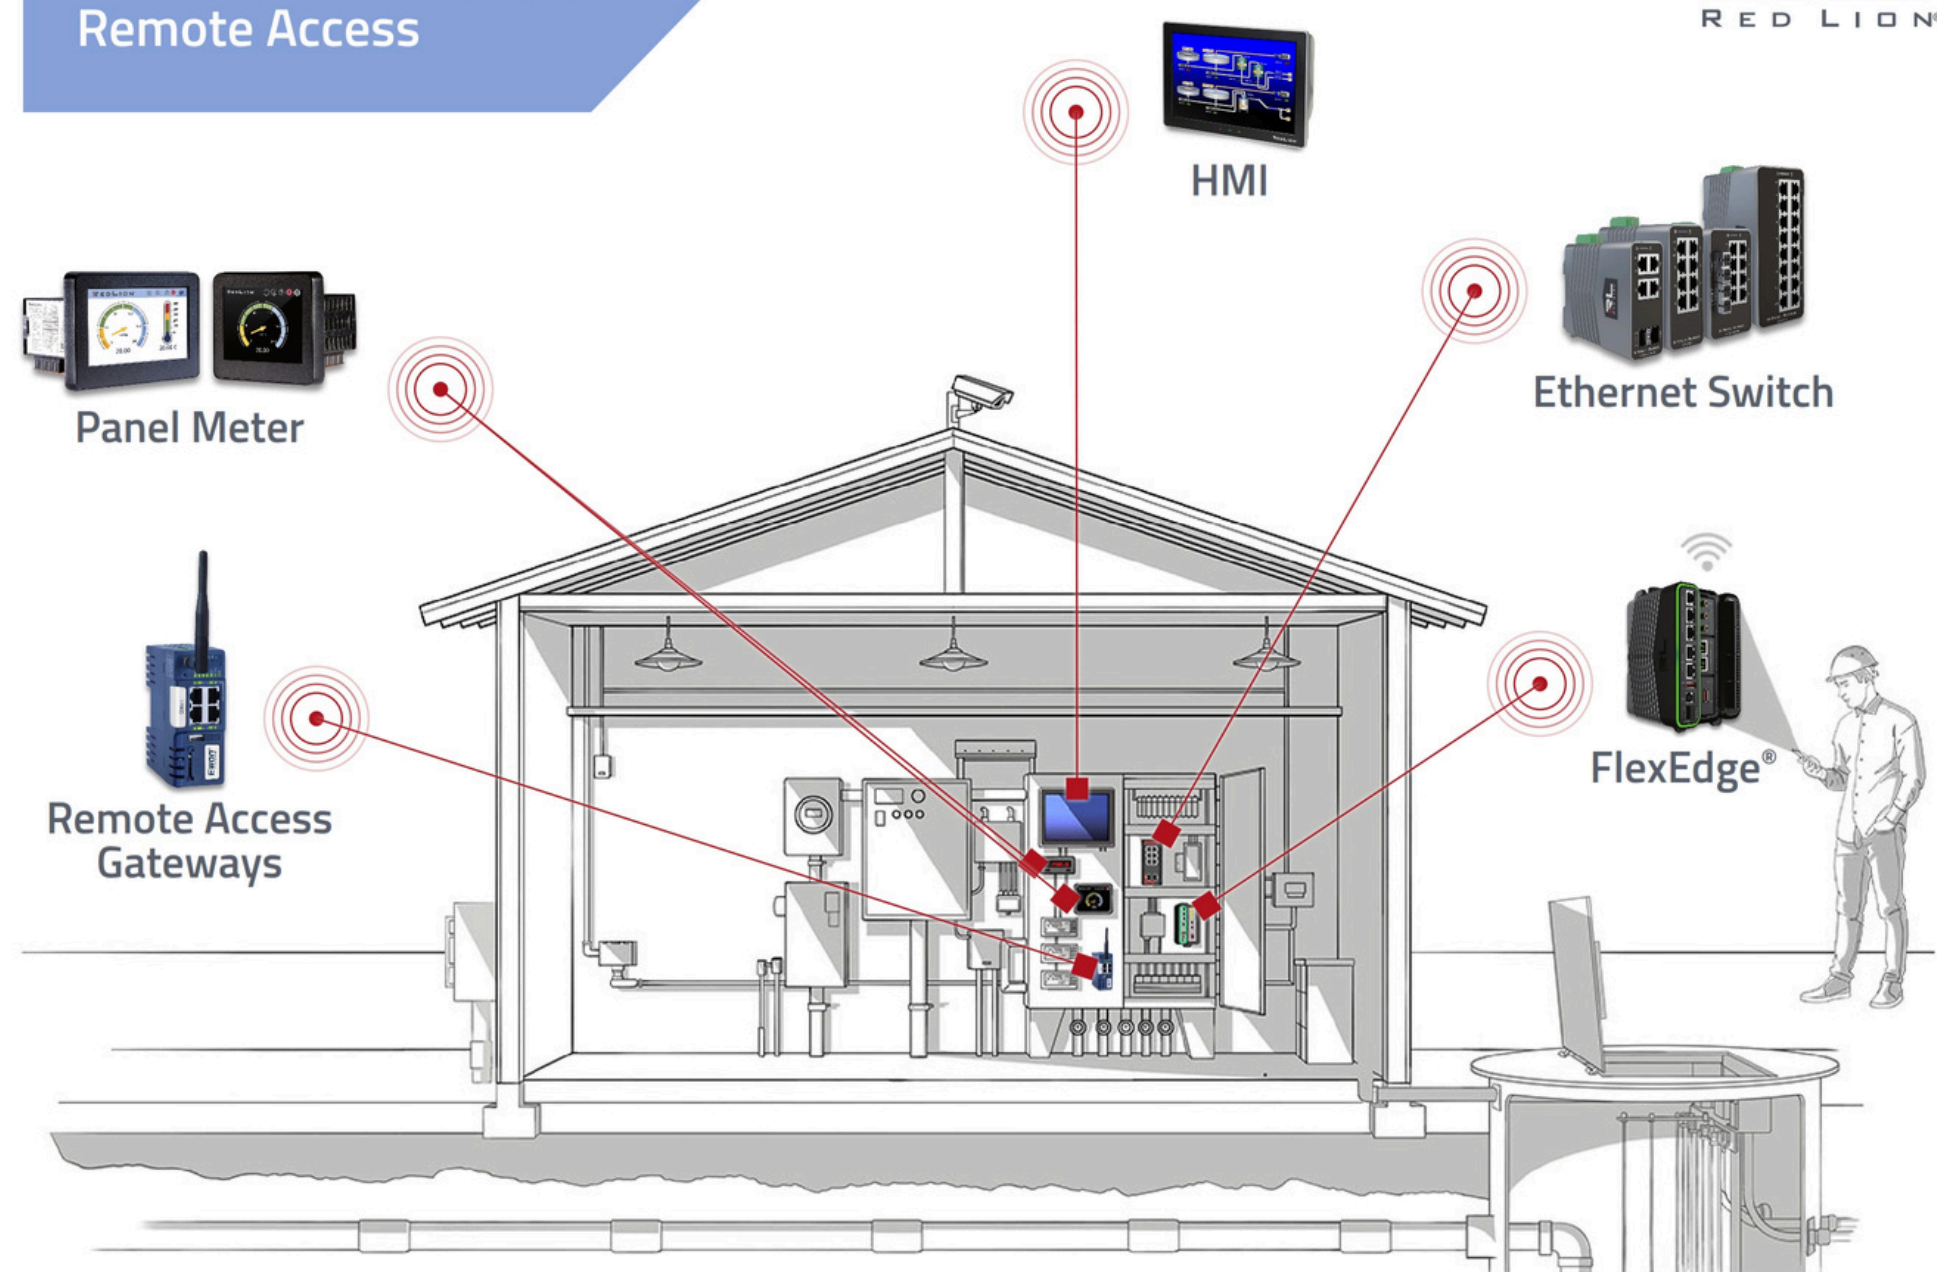

Our solutions lets you connect old and new devices while helping to protect from security breaches. With increasing demands on the water and wastewater industry, costs are rising and efficiencies dropping. Many products are turning to IIoT to make smarter choices—but that doesn't have to mean overhauling your system. From panel meters that put data at your fingertips to platforms that empower you to integrate data from different places, Our products let you upgrade quickly and easily.

- **FlexEdge Solution**
- **Remote Access Router**
- **Ethernet Switchs**
- **Rugged HMI with IO**
- **Digital Panel Meters**
- **Routers**
- **RTU'S**

- Easy to use
- Reliability
- Rugged
- Industry 4.0
- 5000 Graphics
- ABS Approved
- Marine Grade
- ATEX, CE, UL Certificate
- PESO Approved HMI
- 300 Inbuilt Protocol
- MQTT Enabled
- Modbus & DNP3
- OPC UA & SQL
- IP66 NEMA
- Web Server
- Temp. -40 to 75 Deg C

Wastewater Lift Station Remote Access

HMI

Ethernet Switch

FlexEdge®

Panel Meter

Remote Access Gateways

Real-time and Special Process Analyzers to Measure Harmful and Toxic Byproduct (H2S)

- Conformity to ASTM Methods, Field-proven reliability
- Specific to H2S Only - No "false positives", ever
- Accurate and Continuous Analysis
- Measurement in PPB, PPM
- Push Button Validation, Fault Diagnostics relay alarm
- Proven Reliability, Does not suffer from sensor "zero drift"
- Normal Calibrations Not Required
- Fast Response Time, Remote control & monitoring
- ATEX and IECEx certificates

H2S Measurement in Gas, Liquid, Process, Water & Lab Applications
